## New Feature: Live Soccer Scores

Posted by admin - 2007/08/09 07:04

---

I just added a new feature that everyone might find useful. If you go to the main page of our site <http://www.arsenalnfriends.com>, you will see a link "live soccer scores" under the main menu.

Click on that and you will have a popup window that will provide live soccer scores of all the major leagues. You can select the league you want.

You can also resize this window and fit it onto your screen to keep track of results while doing your other stuff on the computer. :)

The only slight bug is that the autorefresh works in IE but not in firefox.

Hope everyone likes it.
