## [doubt] sizes

Posted by ARS\_Portuguese\_Fan - 2007/12/15 15:51

---

Hi people

I would like to know what are the sizes to avatars and signatures in this forum !

Thanks.

Hi ARS,

Don't think there's any limit size for the signature. As long as you link it, it should appear.

For the avatar, if it appears in your profile, the max size is 500px (height) x 200px (width).

Inside the forum, it will get resized to about 60x60.

I dont know if i understood what you said.

You said that for signatures the limit size is what i want and for avatars in this forum the max size is 60x60 ?

You can say me the max limit in this forum please.

(sorry my english)

Hi ARS,

---

The maximum file size is 5MB. You have 1 avatar picture. The signature picture is up to you. Currently, I see you have an Arsenal shirt there.

If you have many pictures, I can create a gallery for you to upload. Do you want that?

I think that you is not understand what i want.

I want know what is the max dimensions to avatars and signs in this forum.

ex: avatar 60x60 ( i think that the size of avatars are a bit short. i can put one bigger ? )

The dimensions to signs are good !

i'm sorry to the work that i'm causing to you.:S

Hi ARS,

You can upload any size for the avatar. The forum will automatically resize it to fit the settings, which is currently at 60x60.

I'll see whether I can increaes it slightly.
